[Perpetual Ocean \(/watch/perpetual-ocean-10824/\)](/watch/perpetual-ocean-10824/)

This animation nicely highlights the energetic turbulent ocean surface currents that are present in the real ocean but are not directly visible to the eye.

Sherry Turkle studies how our devices and online personas are redefining human connection and communication -- and asks us to think deeply about the new kinds of connection we want to have.

[Shifting sands \(/watch/shifting-sands-10785/\)](/watch/shifting-sands-10785/)

Sand in an hourglass might seem simple and straightforward, but such granular materials are actually tricky to model. Ken Kamrin of MIT MechE has come up with a model that predicts the flow of granular materials under a variety of conditions.

This film traces the story of the Center for Cancer Research (CCR) at MIT, from its founding in the early 1970s to its transition to the Koch Institute for Integrative Cancer Research in 2007.
