### Attenborough on Global Warming

11 December 2011 Last updated at 06:39 ET

[Help](#)

Naturalist Sir David Attenborough says people living in the Arctic have "no doubts" that climate change is happening. Speaking to the Andrew Marr Show about his new series Frozen Planet the veteran wildlife filmmaker says that part of the problem of global warming is the increasing world population saying "There are three times as many people on Earth than when I started making television programmes."
