- "...The plant has been closed since April for refueling"???? Is this like the only plant in America that is "safe" when inundated with flood waters?? "The redundant systems are working well"??? Arnie Gundersen of Fairwinds Associates should be all over this story this evening. Did 'The Industry' shut his pie hole & any expert that tries to refute the NRC's gobbly gook??

- Can we now close all our nuke plants? A simple risk analysis says they don't make sense in any way - even economically - but more importantly for the millions of years of potential poisoning.
