## Specific Plants of Interest

The NRC staff has developed web pages for selected power reactor facilities where heightened public interest is expected due to special licensing or performance issues. Web pages are currently available for the following facilities:

- [Diablo Canyon](#)
- [Indian Point](#)
- [Palo Verde](#)
- [Vermont Yankee](#)
- [Watts Bar Unit 2 Reactivation](#)

- [Davis Besse/Reactor Vessel Head Degradation](#)
- [Multiple/Repetitive Degraded Cornerstone Column](#)
- [Reactor Safety Focus Areas](#)
- [Reactor Oversight Process \(ROP\)](#)

See the NRC web page soliciting public comment on [significant licensing actions](#) currently under review by the NRC staff.
