

This Wednesday, Dec. 16, 2009 picture shows the Indian Point nuclear power plant along the banks of the Hudson River in Buchanan, N.Y., about 25 miles north of New York City. As of 2009, the smaller dome at center; the 36-year-old reactor 2 is at left and the 34-year-old reactor 3 is at right. Applications to extend the lives of pressurized water units 2 and 3 are under review by the Nuclear Regulatory Commission (NRC) (AP Photo/Jacobson)
