H.B. Robinson

Location: Florence, SC

Owner: Progress Energy

Near-miss: 1) On the 31st anniversary of Three Mile Island, this event replicated nearly all the problems that caused that meltdown: bad design, poor maintenance of problematic equipment, inadequate operator performance, and poor training. An investigation found numerous problems in many areas over many years. The Union of Concerned Scientists report: "There is simply no excuse for the fact that the company and NRC had not detected and corrected at least some of these problems before this event." **2)** The same problems caused this reactor's second near-miss in six months.
