Respond to this video...

There were a lot of tests when my mother was pregnant with me. Ugh.
cariellbee 11 hours ago

@punchex If hate is something genetic, and there is no control over what ever hatred is, then maybe there is a need for one,800 years with nature versus nurture, it would be really funny watching the royal Symbol running back to Germany, to hide under a rock.....(.....London bridge is falling down falling down.....)
Elevationary 16 hours ago

It's time to use less energy, and make our energy come from solar, wind and geothermal.
kcummings545 1 day ago

Just think of the health effects worldwide of all those tests -- given the lag time of diagnosis and the half-life of radioactive isotopes, not to speak of the genetic damage passed down, we will be living with the deadly effects of those tests for decades.
KUEDCHANNEL7 1 day ago

@echomedia u dont have to explode anything in order to find it just look down. They had more serious reasons then just trying to find some dicks.

Contact the artist some pretty good research!
Should you have any query regarding this artwork, please contact e-mail address below:
Well, this proves it., america is the most destructive and violent country worldwide. hashim is a person, not the CIA and government.. cia and fbi.. y'know.
*The number excludes both tests by North Korea (October 2006 and May 2009).
It's like watching the score of a video game. Nuclear Win, Earth Lose.
wilwilBB 2 days ago

How many bombs do these idiots have to explode before they find their dicks?
