**EVERGREEN
 SUPERTANKER**

DEMONSTRATION TOUR 2006

Evergreen International Aviation's aerial application experience goes back to 1924. Evergreen continues its legacy of leading the industry by combining over 70 years of firefighting experience with over half a million hours of 747 experience to develop the world's next generation of aerial application platforms—the Evergreen Supertanker.

Evergreen has invested 3 years and over \$40 million of its own money to develop a multi-mission aerial application platform capable of responding to firefighting, weather modification, biochemical decontamination, and oil spill response missions worldwide.

The Supertanker will perform emergency response missions to save lives, natural resources, homes, and communities. The Supertanker can do this while saving the U.S. government and industry millions of dollars.

Evergreen is honored to offer the Supertanker to emergency response professional that are working tirelessly to protect Americans from the threat of fire and other catastrophic events.

Mission Profiles Include:

- Firefighting
- Weather Modification
- Biochemical Decontamination
- Oil Spill Containment
