## 2008 Water Quality Report

The City of West Sacramento is dedicated to supplying its customers with a safe and reliable supply of high quality drinking water. We are pleased to present this annual report, which conforms to a federal regulation that requires community water systems provide customers with detailed information about their drinking water. It includes information about water supply sources, water treatment and water quality, drinking water regulations and source water protection programs. We hope that the information in this report increases your understanding of the water treatment process and your confidence in the quality of your drinking water.

Landlords who receive this report should forward it to tenants residing within the city, for their information. Hard copies are available upon request by contacting the City of West Sacramento Public Works Department at (916) 617-4850. For questions about this report, contact Dan Mount, Water Services Superintendent at (916) 617-4860.
