Safe Drinking Water Search for the State of Texas

This search allows you to retrieve Safe Drinking Water data from the SDWIS database in Envirofacts. You may select among four possible search options: water system name, county name, population served, and/or system status.

Disclaimer: Some data may have been entered into SDWIS without a "county served" designation. In those cases, you will either need to search by "Water System Name" (check your water bill for that information), or create a STATE search (click on "Search" button without any other entries), and select your water system from that list.

Water System Search

Enter a complete or partial Water System Name. If a partial name is entered, select the "Beginning With" or "Containing" criteria.

Water System Name:

Beginning With Exact Match Containing

County Search

Use the pull-down menu to select the name of the county. EPA does not have county information for all water systems and a search by county may not produce all systems within that county. Only counties with at least one associated water system are listed.

County Name:

Population Search

All Population Ranges are selected as a default. Click on the box to deselect a Population Range to limit your search. The search will retrieve all water systems serving populations in the selected ranges.

Population Served:

- Very Small (0-500)
- Small (501-3,300)
- Medium (3,301-10,000)
- Large (10,001-100,000)
- Very Large (100,000+)

System Status Search

Active water systems are selected as the default. Select one of the statuses in the pull-down menu to limit your search to a specific water system status.

System Status:
