#### Finding Product Safety Information

#### Wholesale Safety Information & COC's

### Toy Safety is very important to us

Our Products have always been tested for safety and we have always used highly rated, independent testing laboratories. Our products meet or exceed all appropriate toy safety standards.

#### Chemicals

The use of chemicals in our science kits requires extra caution when working with children. All chemicals have been tested and approved for age appropriate use, handling and disposal. Please carefully follow the direction in the kit or on this website for all chemicals.

It is our goal to provide a fun, safe experience for children of all ages using Toys products.

#### Have fun, Play Well.
