Instant Snow Polymer

[Larger View](#)[More Images](#)**Click Here to See It In Motion!**

When water is added to this granular white powder, it instantly expands to 40 times its original volume, producing a snow-like material. Great for showing that there is No Law of Conservation of Volume! This artificial "snow" is fluffy and can be readily poured. When wet, it adheres well to boots and is very slippery. It was used in Steven Spielberg's mini-series, Band of Brothers and is becoming popular as an artificial base for skiers. It even can be used to turn white wine into snow... hmm! You can carry almost two cubic meters of snow in your briefcase; just add water! Its MSDS is the same as for sodium polyacrylate, the 'diaper' polymer! This is a great demonstration of interest to students and educators of ALL ages and abilities. *We reserve the right to limit quantities.*

ADDITIONAL PRODUCTS

[Large Gro-Beast Alligator](#)

These growing alligators start at about 3 inches long and grow to over a foot long when placed in water!

[Slime-Making Kits & Glowing Slime Kits](#)

These kits have everything you need for making perfect slime!

[Sodium Polyacrylate \(Diaper Polymer\)](#)

The super-absorbent polymer found in disposable baby diapers. Also used in many "disappearing water" magic tricks.

[Ultraviolet Detecting Beads](#)

Change color when exposed to ultraviolet light from the Sun or other UV source.
