

HOW DO YOU LIKE YOUR SKIES... NATURAL OR MAN-MADE?

NASA noted in an October 2005 newsletter that increasingly persistent contrails are "...trapping warmth in the atmosphere and exacerbating global warming..." NASA goes on to state that: "...Any increase in global cloud cover will contribute to long-term changes in Earth's climate. Likewise, any change in Earth's climate may have effects on natural resources..."

What impacts are experimental weather modification and atmospheric heating programs having on our climate, agricultural crops, growing seasons, trees, and watersheds?

CALIFORNIA TREE DECLINE

What is triggering such a broad decline and die-off response to an entire suite of plant and tree communities?

General Oak Tree Decline (Without SOD)
Chemise Ceanothus (buck brush)
