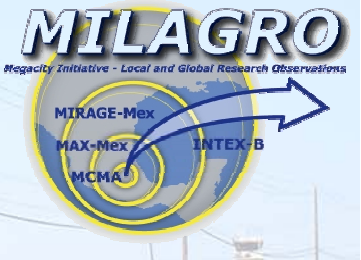
NATIVE (Nittany Atmospheric Trailer and Integrated Validation Experiment) Remotely Sensed Aerosol Optical Properties: Examples from INTEX-B and WAVES 2006

Brett Taubman, Anne Thompson, David Miller, Shannon Michaels, Tim Kane

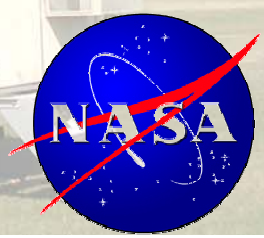
Penn State Dept. of Meteorology

Gordon Labow, Nick Krotkov

NASA Goddard Space Flight Center



PENNSTATE



NATIVE

Nittany Atmospheric Trailer and Integrated Validation Experiment (*www.meteo.psu.edu/~btaubman/Webpage/native.html*):

mobile research facility designed for:

- Aura validation
- Ground-based complement to NASA based field campaigns
- Mobile IONS station
- air quality monitoring
- pollution transport and deposition

PENNSTATE

NATIVE Payload

In-situ trace gas instruments:

TeCo 49C O3 Analyzer
TeCo 48C-TLE CO Analyzer
TeCo 43C-TLE SO2 Analyzer
TeCo 42C NO, NOy Analyzer
En-Sci ECC Ozonesonde Ground Station

Meteorological Instruments (10 m tower):

T, RH, P, WS, and WD

Remote Sensing Instruments:

MICROTOPS II O3 Monitor – Sunphotometer
(305, 312, 320, 340, 380 nm)
Cimel Sunphotometer
(340, 380, 440, 500, 675, 870, 1020, 1640 nm)
YES UVMFR-7
(300, 305, 311, 317, 325, 332, 368 nm)
532 nm Aerosol Lidar

NATIVE Schedule

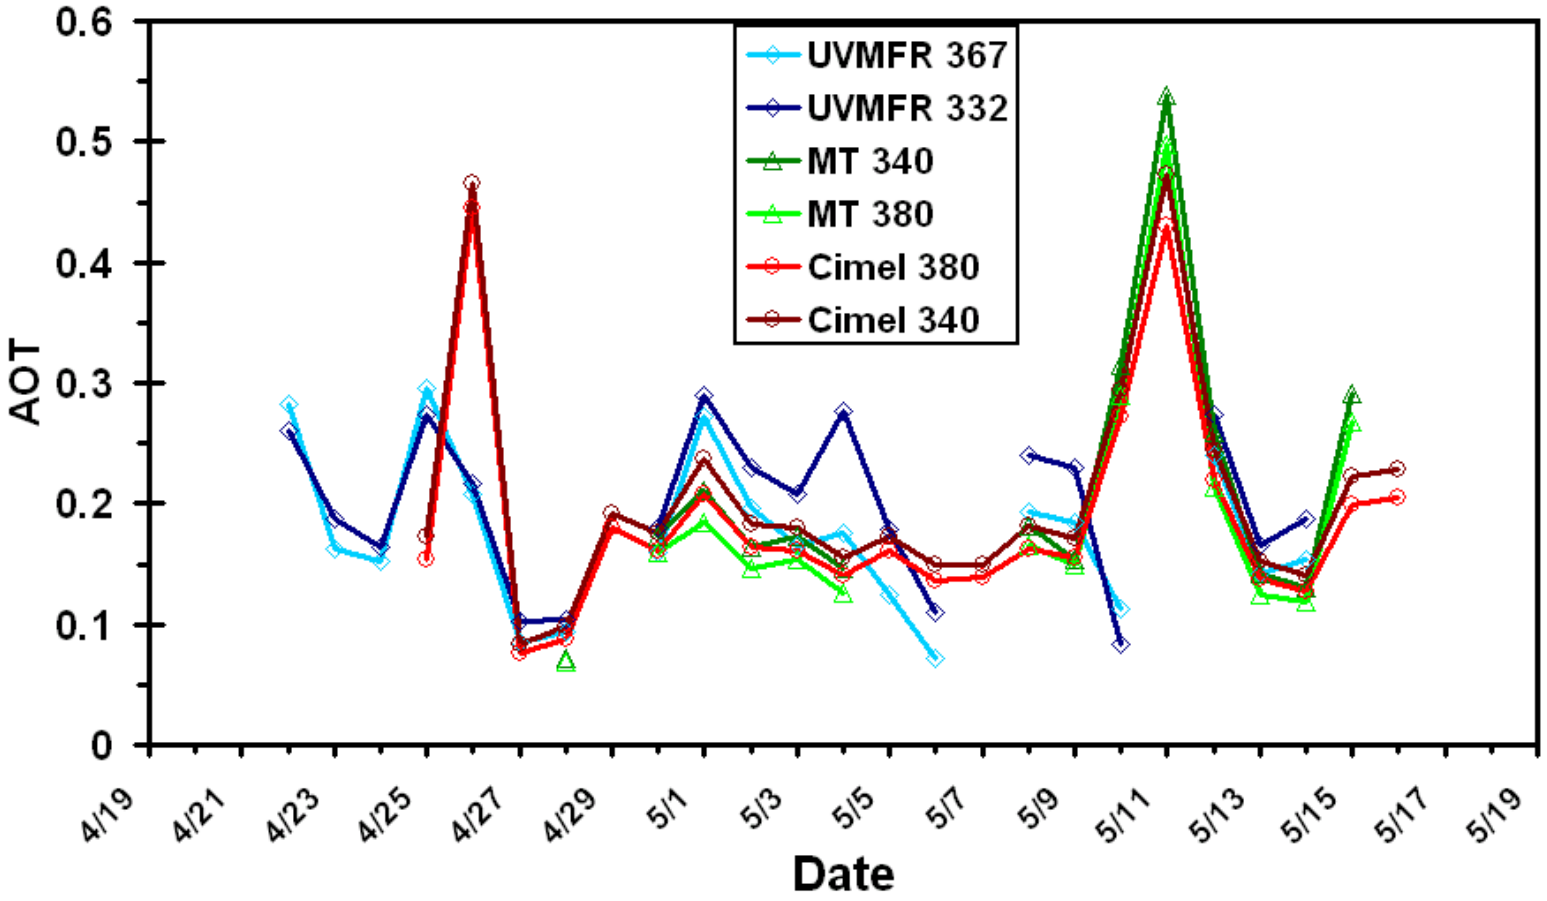
INTEX-B/MILAGRO Phase I
Houston, TX: March 2 - March 20, 2006

INTEX-B/MILAGRO Phase II
Richland, WA: April 21 - May 15, 2006
*Aura validation with WSU MF-DOAS

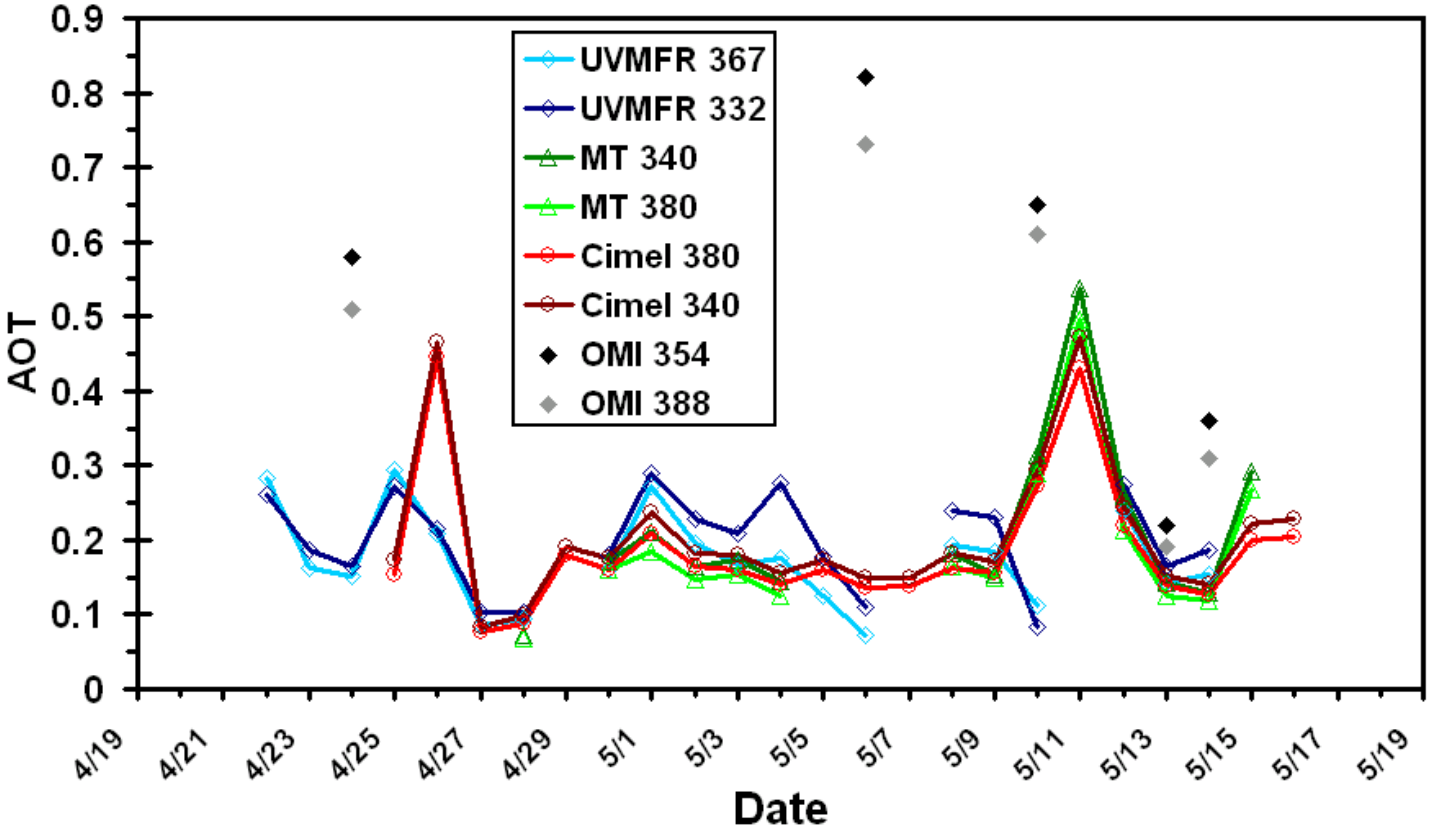
WAVES 2006
Beltsville, MD: July 7 - August 3, 2006

Home
University Park, PA: June 9 - June 29, 2006
University Park, PA: August 24, 2006 - Present

Richland NATIVE AOT



Richland NATIVE/OMI AOT Comparison



- Spatial averaging resulted in cloud contamination
- Work with OMI team to optimize data

PENNSTATE

Beltsville WAVES 2006

Water Vapor Validation Experiment – Satellite/Sondes

July 7 – August 10, 2006

(http://ecotronics.com/lidar-misc/WAVES.htm)

Aura Validation, Instrument Intercomparison, IONS 06 phase III at the Howard University Beltsville, MD campus

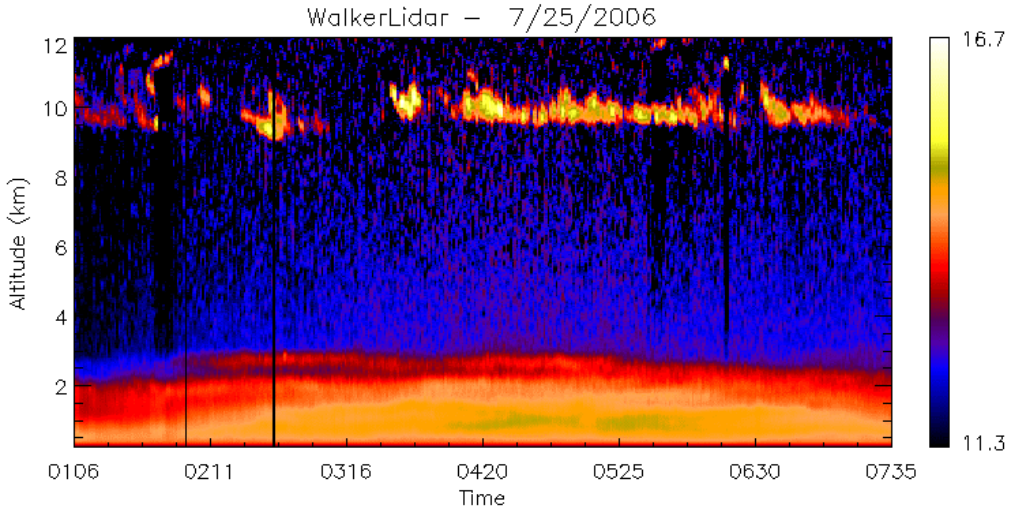
Participating Groups: NASA-GSFC/WFF, Howard U., UVA, PSU, UMBC, NWS, NCAR, CU-Boulder

WAVES data, IONS images available:

http://avdc.gsfc.nasa.gov/Data/WAVES/

http://croc.gsfc.nasa.gov/intexb/ions06.html

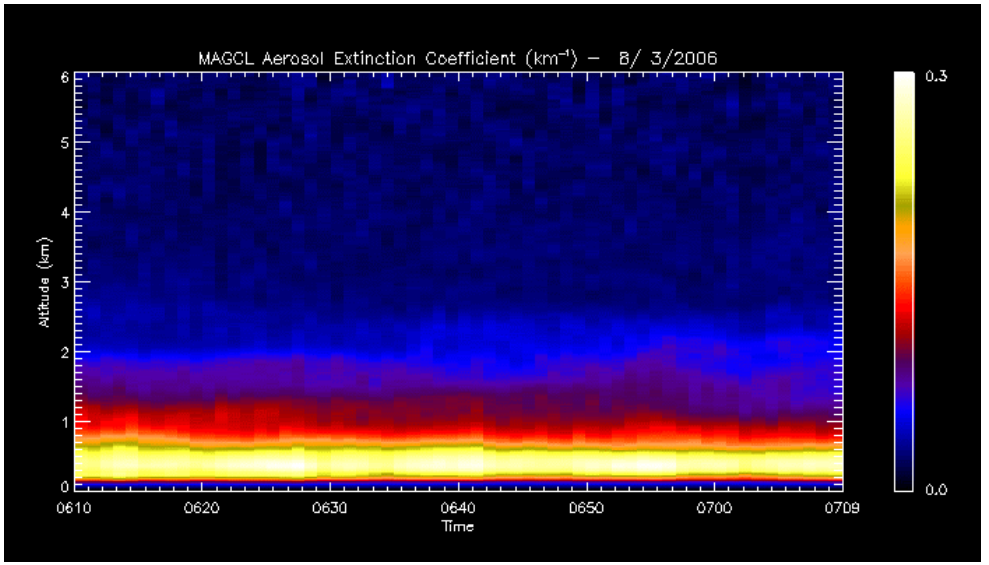
WAVES NATIVE Lidar



532 nm lidar operated nearly continuously during WAVES

Observed clouds and aerosols throughout the troposphere

Data are being calibrated using co-located cimel and radiosonde launches during WAVES



PENNSTATE

Summary of Initial Results

- Rapidly processing NATIVE aerosol optical property data from multiple campaigns
- WAVES NATIVE/satellite comparisons are in progress – stay tuned for AGU
- Proof of Concept - NATIVE single platform provided multiple measurements (ground-based in-situ and remote sensing) for intercomparison/validation purposes at WAVES – prototype deployment for TC4
