Monsanto has already negatively impacted agriculture in African countries. For example, in South Africa in 2009, Monsanto's [genetically modified](#) maize failed to produce kernels and hundreds of farmers were devastated. According to Mariam Mayet, environmental attorney and director of the Africa Centre for Biosafety in Johannesburg, some farmers suffered up to an 80% crop failure. While Monsanto compensated the large-scale farmers to whom it directly sold the faulty product, it gave nothing to the small-scale farmers to whom it had handed out free sachets of seeds. "When the economic power of Gates is coupled with the irresponsibility of Monsanto, the outlook for African smallholders is not very promising," said Mayet.

Monsanto's aggressive patenting practices have also monopolized control over seed in ways that deny farmers control over their own harvest, going so far as to sue-and bankrupt-farmers for "patent infringement." Monsanto was declared [company of the year by Forbes](#) magazine in 2009, despite its history of agricultural abuses. Monsanto has also been accused of dumping toxic waste in residential areas, resulting in a variety of severe health disorders.

We complain about the drug companies, yet most all of America is supporting drug companies through doctor prescribed drugs. The drugs are from hell itself and how many are taking prescribed drugs. Find a natural and safe alternative and STOP empowering these drug companies by buying their toxic death potions just because you ignorantly imagine your doctor knows anything about health. He is trained by drug companies and does not even learn about nutrition. OUR BODIES do not have a drug deficiency. Stop taking the toxic death vaccines as well. The drug companies control vaccines as well. DON'T TRUST THEM. Why do you think a whole nations cancer rate increased? The common denominator? VACCINES. You can't blame foods when infants have cancer, tumors and leukemias. IT is VACCINES. Wake up and stop buying drugs.

The danger for a lot of the world population, Is that this GMO'S technology can be used to make plants like Corn or Soybean, or bacteria or algae, to produce any chemical or virus that can really damage or affect us, in a big way and little by little (time) that can really affect a lot of people, seems like these plants can do anything the 1% wants, and will affect the 99%, can you see this. A product developed by the 1%, for the 99%, they don't even use it, they eat organic. This could be a Weapon for mass destruction. I think We need to force and make the FDA, USDA, Health departments get together and really make a protocol (rules and laws) approve and to really test proof the safety of using all the GMO'S that are been produced. stop the insanity.

Maybe, just maybe, he will try to change it from within. His foundation HAS done some good work, and the intentions are good. Maybe his influence can change them to be responsible. Maybe not, but it's a different perspective.

Please watch this documentary about GMOs and how the crops are deficient in nutrients, some as much as 80%. Also the animals which are fed GMOs are becoming impotent and having far more miscarriages. Dr. Mercola interviews a scientist, Dr. Huber, who researches GMOs and this is what he has to say about it. The Bill and Melinda Gates Foundation have given more money and jobs to people around the world than most countries have ever contributed! The word retard is a word that has been used to describe people forever... Not everyone believes in all this liberal political correctness crap... Get over it..

GMO foods are the easiest form of population control. Its already happening to thoughtless people in this country and worldwide. Bill Gates is part of the world's elite that want the population to be reduced ASAP. If you don't understand how GMOs and population control works, then you should read the book, "Seeds of deception" to understand what they are. Once you understand how they are the lowest grade of food, and are being pushed on people all over the world, then you can see the conection between GMOs and people dying. Until the mainstream understands that toxins = cancers, and toxins = disease, we are going to continue to be screwed over by them.

[Reply](#)

- *Anonymous* says:

There ARE too many people on the planet. 7 billion is way too much stress on our earth and there is no way to naturally feed that many people.  
I have issues with Bill Gates for other reasons, but supporting populational control is one of the smart things he's doing.  
What is wrong with wanting to reduce the population down to a sustainable number? One where people don't have to starve or go without clean drinking water?

[Reply](#)

- *Another Anonymous* says:  
[December 13, 2011 at 4:57 am](#)

Who, exactly, gets to decide which of those 7 billion should be done away with? And are you willing for you and your family to be among those to be gotten rid of to help ease the “stress on our earth”? Or do you think you have more of a right to live than someone on the other side of the planet, hm?

He is a supporter of these criminals Monsanto and their ilk in creating Franken Food.

I used to admire Bill Gates but that changed soon as I became aware he is not on the people's side.
