NOTE: Scorecard combines data from the U.S. EPA [Toxics Release Inventory](#) (TRI) with [information on the potential health hazards](#) of toxic chemicals. These reports account only for pollution from industrial facilities that reported to TRI in 2002 (the most recent year available) and include only the 650 chemicals covered by TRI. Scorecard cannot tell you whether the amount of pollution in your own area is safe or unsafe. Scorecard tells you which chemical releases in your area

might be of potential health concern, based on available data, and helps you identify the highest priorities for pollution prevention.
