All:

[Last night we halved our contracts which is indicative of "no surplus"
so we were also forced to stop serving RVCWD as of 3/1.]

Obviously the folks in RVCWD need water and need to be served. Time to dust off the old agreement and get things tee'd up for switching them to 12947A.

It was sad to see other Districts so insistent on throwing them under the bus and it makes me more motivated than ever to get them into the District.

Bill:

I'll call you as soon as I get in around 10. Nice to know they kept their word. Geez

Subject: Conservation Reduced

All:

Last night the RRFC Board of Trustees adopted several motions in an effort to manage regional water supplies in response to the on-going drought and improvements in supply. The actions that were approved were:

- 1) RRFC will serve Redwood Valley up to 355 af in 2014 to meet their basic human health and safety needs. This amount is based on calculations done in concert with California Department of Public Health. 355 acree-feet will supply RVCWD's needs for municipal use at a rate of 80 gallons per person per day. RVCWD will need to find an alternative source/basis of right for any additional water. Redwood is currently working with Millview CWD to obtain additional supply. RRFC will also continue to look at alternatives to serving Redwood in an effort to maximize available supply for its contractors. The RRFC Board of trustees will consider alternatives at its May 12,2014 meeting.
- 2) RRFC has reduced mandatory conservation from 50% to 25%.
- 3) The Sonoma County Water Agency will make releases for frost in co-ordination with RRFC and the Mendocino County Farm Bureau.
- 4) Significant frost releases may affect the amount of water available for late season irrigation. SCWA may ask for additional conservation to mitigate for storage losses if necessary. SCWA will work with Ag to develop any necessary plans.

Please feel free to contact the District if you have any questions regarding these actions.
