UV Index

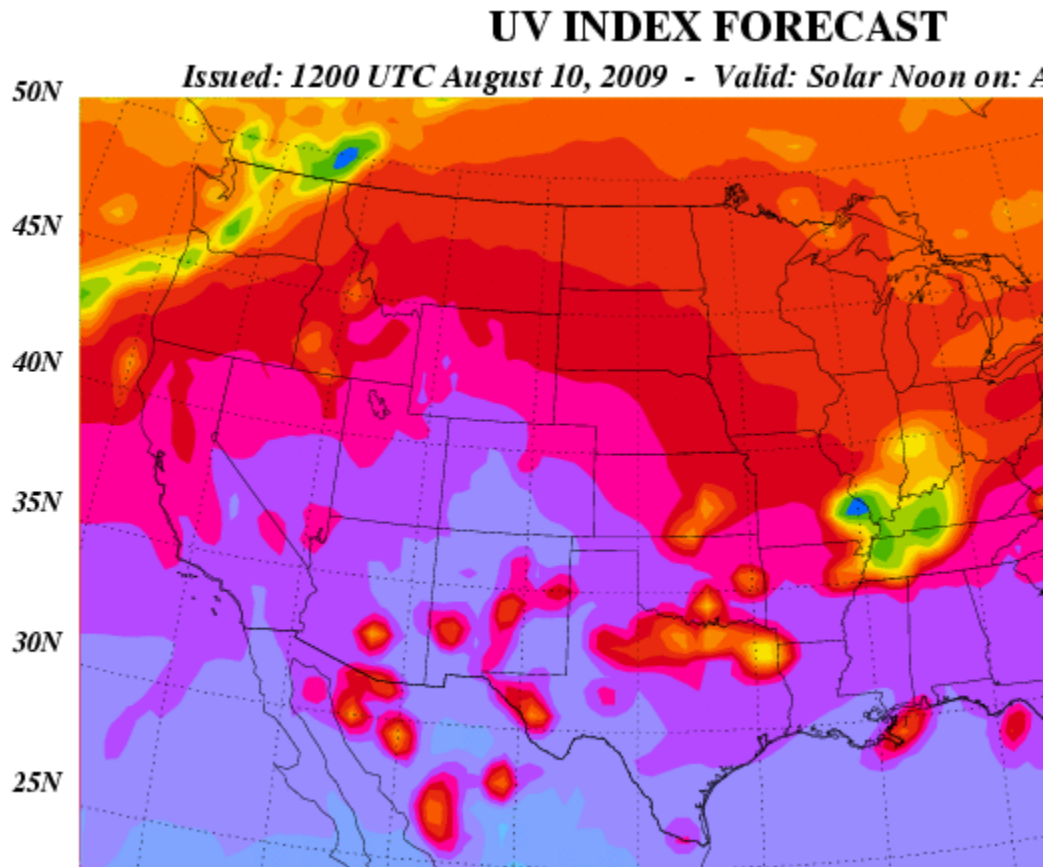

[Four-day forecast map](#) | [Lookup your index](#) | [Related links](#)

The ozone layer shields the Earth from harmful UV radiation. Ozone depletion, as well as variations, cause different amounts of UV radiation to reach the Earth at any given time. [National Weather Service (NWS) and EPA, the UV Index predicts the next day's ultraviolet radiatic helping people determine appropriate sun-protective behaviors. EPA will issue a [UV Alert](#) radiation is predicted to be unusually high, and consequently the risk of overexposure is c

UV Index Forecast Map

The forecast map shows contour lines of predicted UV Index values during the [solar noon](#) from National Weather Service forecast data. **Click the buttons for Day 2, Day 3, or Day 4 forecast for following days.** You may notice a brief delay as each map loads. (To find th location, use the [sunrise-sunset-solar noon calculator](#) at the NOAA Web site.)
