About FIRMS

FIRMS provides MODIS hotspot / fire products to natural resource managers around the world in easy to use formats.

The active fire locations are processed by the MODIS Rapid Response System using the standard MODIS MOD14/MYD14 Fire and Thermal Anomalies Product. Each active fire location represents the center of a 1 km pixel that is flagged by the algorithm as containing a fire within the pixel. In the near future, FIRMS will also display the MODIS burned area product.

For more information on FIRMS, please refer to the [background information](#) on FIRMS.

Data Policy

The data and graphics from this site can be used freely. Please acknowledge Fire Information for Resource Management System (FIRMS) as the data distributor ([Citation Information](#)). If you can not find what you are looking for, please [contact us](#).

Please read the [Disclaimer](#) for more information about using data from this website.

FIRMS Team

Diane Davies - Principal Investigator

Chris Justice - Co Investigator

Shriram Ilavajhala - WebGIS Developer/Programmer

Mike McGann - WebGIS Developer/Programmer

Minnie Wong - GIS support

Giuseppe Molinaro - GIS support

Support

Funding for FIRMS comes from the National Aeronautics and Space Administration (NASA) under the Cooperative Agreement No. NNS06AA04A issued through the Decision Support Program and from the United Nations Food and Agriculture Organization.

This material is based upon work supported by the National Aeronautics and Space Administration under Cooperative Agreement No. NNS06AA04A issued through the Decision Support Program and from the United Nations Food and Agriculture Organization.

The MODIS active fire data is provided by the MODIS Rapid Response System. For more information about MODIS Rapid Response, see <http://rapidfire.sci.gsfc.nasa.gov>
