2010 04 15 04 UTC meteor

Peter Pokrandt

Image taken:

Apr. 15, 2010

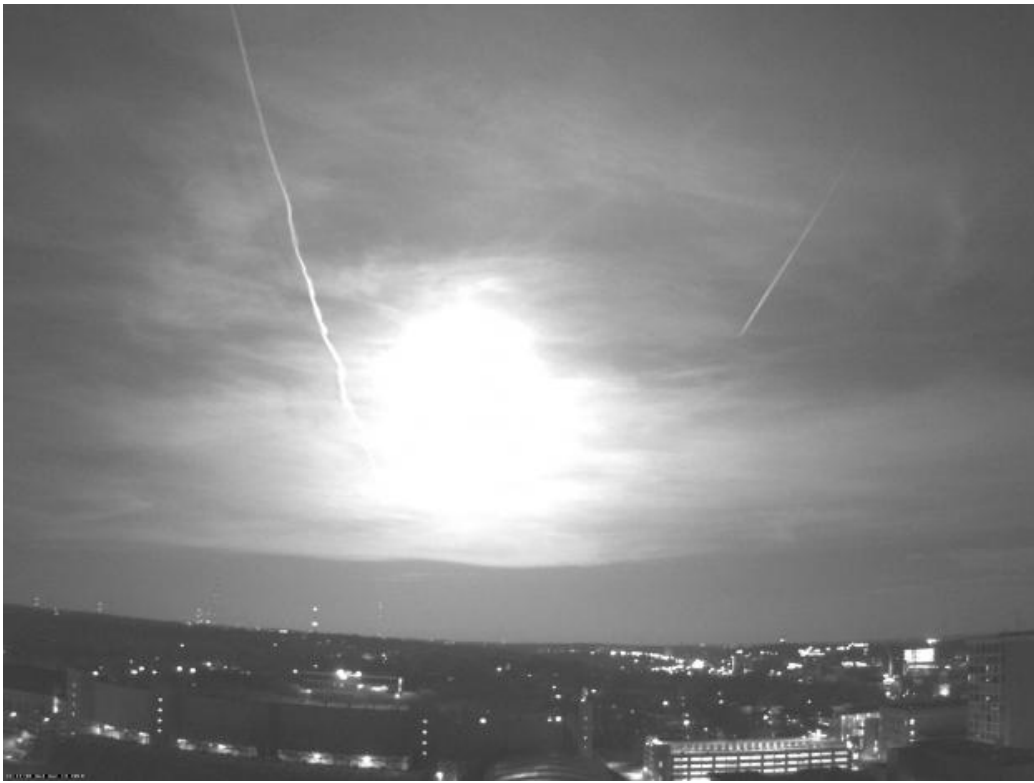

Location:

These were taken from a web cam on the roof of the AOSS building, downtown Madison, WI, USA

Details:

The meteor was bright green at first, and the sky was almost blue for a few seconds. The meteor then broke into several pieces and glowed orange as it faded away. Was visible for 10-15 seconds. The loop shows a plane going by, then the fireball that illuminates the contrail of that plane (and another from a previous plane that is not visible) The pictures were taken at 10PM CDT on April 14, 2010 (03 UTC April 15, 2010) Please credit University of Wisconsin - AOS/SSEC for the images.
